LUCRETIUS

I have owned print copies of the Loeb edition, but I have been looking for free downloadable PDF version of this edition for a very long time. Not sure why it took so long to find it, but I find today that Google has digitized it and has it available for free download. I suggest downloading a copy as this is the best and maybe only free side-by-side Latin English version available. Current editions are co-edited by Martin Ferguson Smith, who has extensively revised, added his own material, and even published a separate edition at Hackett Publishing. This download appears to be from the first edition, revised in 1924, and it contains an introduction which I have not seen which may be a good find in itself.
