I dunno, I think a good metaphor is going to be extensible to cover the closely related issue of "What about variation?"

Okay, I'll give you that, but I don't like the idea of the spilling over as variation. It seems... messy.

I could see if the glass is tipped or jostled and there's spillage, that makes sense that the mind is still troubled and anxious. It's not steady.

But a variation analogy? I'm going to have to ponder that.

What about a change in state of what's in the glass? It could be liquid, it could be frozen, it could turn to wine, it could turn to orange juice.

I'm trying to get away from adding to it, because it's at it's natural limit but there can still be variation within the glass.

Still gonna have to ponder...
