

Debate Arising from James Webb Space Telescope

Post by "Don" of August 25, 2022 at 8:24 AM

Webb does not debunk the Big Bang... This video cited that exact article...

<https://youtu.be/1S2CxPUZDOY>

"This is simply not true. The JWST has not provided evidence disproving the Big Bang theory, and cosmologists aren't panicking. Why, then, are we seeing viral social media posts and funky headlines that suggest the Big Bang didn't happen at all?

To answer that question, and show why we should be skeptical of claims like this, we need to understand where the idea came from."
