

Kalosyni's Personal Epicurean Outline

Some further thought:

1. I may have added in a few ideas which are not backed by Epicurean sources, and I need to be clear about what the sources actually say (and what they don't say).
2. I need to be clear if what I wrote is correct.
3. Now in our present time, is this helpful or needed? Will anyone find this useful? What parts of the philosophy are the most helpful or needed?
