

# Epicurus' Birthday 2023 - (The Most Comprehensive Picture Yet!)

**Post by “Elli” of December 16, 2022 at 12:06 PM**

Hello to all epicurean friends, 😊

I was late to answer at this thread and on the issue, as has been studied and written by our friend [Don](#) , and discussed with the rest of us, because I had a private communication with a greek person named Orestis Pylarinos who keeps everyday and with responsibility the ancient Athenian Calendar with the customs and celebrations of ancient greeks.

Orestis Pylarinos is a mathematician, he speaks both the greek and english language, as he has studied in the US at UCLA Mathematics. In our communication, Orestis Pylarinos said to me, that he would have no problem joining this discussion as it evolves, concerning which is the right date to celebrate the birthday of Epicurus. 👍

[Cassius](#) , my friend, please inform me if it would be ok with you to announce him this website forum and his participation to it. And IF yes, please give me some instructions and info. 🤔

Thanks.

P.S. 1. Orestis Pylarinos profile at FB in which he announces in public, the ancient Athenian Calendar is at this link. We read at this link that he refers to Epicurus birthday.

(<https://www.facebook.com/SacredAthenian...aK7BFZV1gj8Zt2I>)

2. And the website with the ancient Athenian Calendar is at this link:
