It looks like the full article that Glidden wrote later is:

Glidden, D. (1985), 'Epicurean Prolepsis', Oxford Studies in Ancient Philosophy

Until I can track that down I just want to again indicate my appreciation to Don because the article he found has already converted my views on this subject to Glidden's camp, which I had never read before today. It might be a good way to summarize it to say that Dewitt was right in not trusting Diogenes Laertius but he should not have trusted Cicero either! Whenever I see someone pursue the argument that our understanding of Epicurus has been altered by Stoicizing it I tend to find that path very helpful.

This is the one we need 1985 Volume III:
