

# 2030 is close

**Post by “Cassius” of March 14, 2019 at 1:46 PM**

No way we wait til 2030! It's been far too long a wait already. Surely by the end of 2020 at the very latest we can pull together something.

Talking to Michele today has reminded me that we need to pull together some kind of method for identifying where people are so we can work on finding mutually-workable locations.

Long ago I put together a section of the forum here to be divided geographically, but I bet we can do much better. Currently: [Regional Epicurean Groups and Activities](#)

I bet there this a way to do this graphically and make it into a feature of the forum. Presumably google maps or some other free service has a facility to pull allow people to mark themselves on a map and then provide a continuously-updated summary graphic. That we people could get an idea of how close they might be to pulling off a regional meeting. A sort of **Epicurean Registry**, but with good security and confidentiality to allow people to sign up without giving out their detailed person information.

If anyone knows such a thing, please let me know -- I will go looking myself in the meantime.
