

Creating a "Seven Steps to the Ethics of Epicurus"

Post by "Don" of September 3, 2023 at 10:13 PM

I would agree with [TauPhi](#) in general that calling out climate change specifically isn't necessary as this falls under the study of how the universe works and of natural science.

I see where [Kalosyni](#) is coming from though about seeing it as a safety and security issue, but I don't think it necessarily needs its own call-out. Not to say it can't come up in discussions!
