Thank you, TauPhi!!
This part intrigued me:

[Quote from TauPhi](#)

the most important of them were previously quoted by H. Diels.

This is no doubt Hermann Diels who co-wrote some papers with Usener and some of his own work. If Powarkow provided any specific citations to Diels, I'd be curious to dig those up on Internet Archive. Unfortunately, Powarkow's book isn't digitized on Internet Archive.
