

Mental pleasure/pain more intense and longer lasting than physical pleasure/pain

Post by “BrainToBeing” of December 10, 2023 at 4:20 PM

Should the topic of pain be of interest I can talk about the biology and psychology of pain at great length. And yes, "existential" (psychosocially driven emotive pain) is more vexing and more long lasting than nociceptive (physical structure) pain. It is a major player in many forms of "chronic pain".
