

"Space Weather" - Solar Flares

Post by "Kalosyni" of March 8, 2024 at 9:44 AM

I found this very interesting website which gives updates on space weather and space phenomenon, with interesting nearly daily changing updates. Today's entry talks about sunspot AR3599 and SAR arcs.

[SpaceWeather.com -- News and information about meteor showers, solar flares, auroras, and near-Earth asteroids](#)
