[Don](#) How does *tagathon* relate to *telos*?

In connotation. Tagathon τᾱγαθον is ultimately simply "good" agathon with the definite article "the" added to the front: t + agathon = "The Good". As opposed to agathon "a good, good (adjective)"

They're basically referring, I think, to the same thing: that to which all other things point; the ultimate reason why we do what we do.
