

Episode 217 - Cicero's On Ends - Book Two - Part 24 - Does Luck Control Whether An Epicurean Is Happy?

Post by "DavidN" of March 13, 2024 at 5:20 PM

Sprat sounds like candlefish we have here. I've seen people lined up along the pass hauling in buckets of candle fish during spawning. But you'll never see them on a menu. "The name "candlefish" derives from it being so fatty during spawning, with up to 15% of the total [body weight](#) in fat, that if caught, dried, and strung on a wick, it can be burned as a candle."
