

Is 'happiness' a proper translation of the term eudaimonia?

[Quote from Titus](#)

I remember that the tenor in the German literature on eudaimonia tends to interpret the term as "living/having achieved the good life"

Suddenly the phrase "La Dolce Vita" pops into my mind, and thinking there might have been an earlier Italian original meaning (not the current "English" meaning of a life of excess luxury).

Here is a fun clip with an Italian guy explaining it:
