

# Scientific Support for Psychological Hedonism

Post by “Pacatus” of April 21, 2024 at 3:33 PM

[Quote from kochiekoch](#)

The science shows everyone IS a psychological hedonist , and the science is what is empirically known. He or she may deny the science, like a creationist denying evolution, but that's what's actually true.

Or the Stoic denying that feeling pleasure at her accomplishments (a good self-pat on the back?) guides her pursuit of virtue?
