

Status Update on EpicureanFriends Forum Technology And Use

Post by “Kalosyni” of May 6, 2024 at 11:51 AM

It seems to me that the "conversations notification" is not very noticeable, and then when a member logs onto the forum very quickly, they don't notice that they have received a private message.

I sent a message and it shows that the person was "online" but it still shows that they did not read my message.

This happens with new members in particular, it seems.
