[Quote from Joshua](#)

Words that start with Χαπ- seem to be exceedingly rare.

Very good point, the fact that "Χαπ-" does not seem to even exist as the beginning of any word should have been my clue that one letter probably needs to change!

[Quote from Don](#)

Grenfell has χαριέστερον.

It is interesting that Grenfell comments on the ος/ον change but says nothing about χαρ/χαπ.

Χαριέστερον must be the answer. Thank you both!

-----

I see Grenfell translates it as "more taste on his part"

I think I will go with "more refined" for the moment:

"Indeed, possibly such a person at times is more refined than other laymen, but still not in this way at all does the firmness of piety exist."
