1. I hope you find it!

2. Yes I may have more to say about that Ben Stein movie which you first mentioned. The main Richard Dawkins section (a short dialogue with Stein, which occurs after Stein visits that location pictured) is worth watching for the way it crystallizes some of the issues we are currently discussing. No doubt Stein edited it in a way slanted against Dawkins, but I think Dawkins would have been better advised to at least mention the possibility that Epicurus' externality argument is by no means out of the running as a response to Stein's "so give me the details of what happened first?" approach.

I will find a way to pull that out at some point so we can discuss it further.
