

Luck

Post by “MaiTaiNye” of September 16, 2024 at 4:52 PM

I am still studying this philosophy and interesting questions pop in my head. One of the topics in my head has to deal with luck.

What does the philosophy or Epicureas state about luck? Can a person be lucky or unlucky? For examples, someone gets all of the winning powerball numbers or just misses getting hit by a car. Are these examples considered luck or simply mathematical probabilities that actually did occur?
