

«Embraced (Entangled) Forever and Ever» (Post By Elli At Facebook from Dimitri Liantinis - Excerpt From Gemma)

Post by “Martin” of September 21, 2024 at 4:53 AM

We should read Elli's claims as analogies, and not as identical ideas to modern science. The text would be a lot more complicated and less impressive if it was formulated in every sentence as analogy. Similarly, scientists mostly refer to reality instead of models because it would make their papers even less intelligible if they would explicitly include the model character of their theories in every sentence.
