

The "meaning crisis" trend. How do you answer it as an Epicurean philosopher?

I think my main issue with the meaning crisis is mostly the claim of objectivity, if you want subjective meaning such as Jean Paul Sartre and Simone de beauvoir talk about that's honestly fine.

How these meaning crisis promotors, don't want simple existentialism subjectivity but rather theistic like objectivity!

Also it's subverts our naturally faculties by asking "wow, is your body telling you something is pleasurable *really* enough for you?"

At least that's how it seems to me.
