This is an interesting discussion, but I still wonder what can be done to bring Epicureanism to the attention of more people, so that they at least have the opportunity to find out about it. Should I try to create and post Epicurean memes on social media? Should I launch an Epicurean blog somewhere? (I ran a search for "Epicurean" to see if there are any such blogs on Substack, and all of the ones I could find with the word "Epicurean" in the title were food blogs!)
