

Nothing Ain't Worth Nothing....

Post by “kochiekoch” of November 6, 2024 at 12:11 PM

[Quote from Cassius](#)

So what position are you guys taking as to whether "empty space" exists?

It's there, it's just filled with virtual particles that pop in and out of existence, borrowing the energy of that empty space. All this in addition to the atoms that fly through them.

[What is Quantum Fluctuation?| scienceshorts|](#)

So even a vacuum isn't exactly nothing.
