By Zeus!! It took me *forever* to remember what the Usener citation Vol. Herc. 2, I.127 referred to! I'm placing this here for future reference:

Vol. Herc. 2 or simply VH² refers to *Herculanensium voluminum quae supersunt collectio altera* in at least 8 volumes. The I is the volume number (ie, volume 1), 127 is the image/plate number. Here is the archive link to all volumes:
