

Episode 259 - Nothing Comes From Nothing

Post by “Pacatus” of December 23, 2024 at 4:04 PM

[Quote from Cassius](#)

What I will say is that my gut tells me that people who go down the rabbit hole too far in mathematical theory are never going to accept that no matter how internally consistent their systems might be

I remember years ago wading through a book – *The Mystery of the Aleph: Mathematics, the Kabbalah, and the Search for Infinity*, by Amir D. Aczel – in which it was suggested that single-minded pursuit down that very “rabbit hole” contributed to the mental collapse of mathematicians Georg Cantor and Kurt Gödel. (It was a difficult but engaging read, as I recall.)
