Perhaps this:

Quote

## Definitions

### Definition 1.

A *point* is that which has no part.

### Definition 2.

A *line* is breadthless length.

So the objection is that his definitions (a point with no part; a line with no breadth) is "inconceivable" - because we judge what is conceivable by what the senses tell us?) or otherwise not something that we can observe in reality, and thus not relevant to us (?)
