From [Elli Pensa](#):

First of all, I would like to express my warm congratulations to all Epicurean friends who will participate in this special livestream! Indeed, this will be a great opportunity to clear up many misunderstandings surrounding the name of our beloved philosopher Epicurus.

I would also like to suggest an idea to our friends: as an introduction and just before this special livestream begins, there could be a nice "sound effect", for example, with this paragraph from [Epicurus' letter to Menoecus](#), which has been reconstructed in the ancient Greek-Attic dialect by Mr. Ioannis Stratakis.

Also, as a conclusion and at the end of the livestream, we could ask our friend Bryan to read a small excerpt from Lucretius' DRN in Latin. In my opinion, it will be like hearing these two great figures, Epicurus and Lucretius, speaking to us live in their own languages! page not found or type unknown
