

Dark Energy experiment challenges Einstein's theory of Universe

Post by “Matteng” of March 30, 2025 at 2:58 AM

Would that fit in Epicurean Cosmology ?

Big bang and big bounce / crunch was more the Stoic view or ?

And that the void is not complete empty but has energy and quantum fluktuation. Otherwise the idea that even void or space consists of a kind of particle or is quantized and not unlimited divisible and that the most of the cosmos is not much beneficial / providental to life fits more to Epicurean worldview.

Also that many cosmoi can exist develop.
