

Outline for book "Raising Children in the Epicurean Philosophy"

[Elayne](#) : The outline looks fine to me.

I guess that adolescence is no more part of childhood and therefore outside the scope of your book. During our son's adolescence, things got really painful and it was no more obvious what to do. I would have dearly needed guidance on how to deal with strong disagreements between the spouses and between spouse and son during that period. With one spouse strongly influenced by Confucius (i.e the East Asian predecessor and equivalent of Plato) and the other being (at that time implicitly) Epicurean, the conflict between spouses was impossible to hide from the son and certainly caused confusion and had negative effects. I am almost surprised that he has turned out just fine so far, has already earned his bachelor's degree and seems to be on track for a pleasant life.
