

Must All Things That Have A Beginning Have An End?

Post by "Eikadistes" of May 1, 2025 at 10:48 AM

The caveat here is that anything that is capable of being generated, or destroyed can neither be an uncuttable particle, nor void nature. Otherwise, everything else is fair game.

Give that "Particles" + "Void = *The All*", I might avoid using "all things", if we are to suppose the plethora of particles and the boundless void to be things among "all things".
