This week we are going to try to get from [Section 42](#) to the end of Part 1 at Section 49. That means we're going to go very quickly through Cicero's lengthy tails of the deaths of great men from the Roman and Greek past, and focus on any remaining philosophical arguments.

If you see anything in sections 42 to 49 that you'd like to be sure we cover, please be sure to add it to this thread.
