[Quote from Eikadistes](#)

ὄγκοι (όνκοι, "hooks"),

Although that exists, Epíkouros mostly uses:

["ὄγκος \(B\), ὄ, bulk, size, mass of a body"](#)

**ὁ ὄγκος** is really his main word for "particle."

I fully agree with your point, even using this example I could see us being "*oncologists*" instead of "atomists" (*but that word was taken for other uses*).
