

Article: Scientists in a race to discover why our Universe exists

Post by "Kalosyni" of May 20, 2025 at 10:30 AM

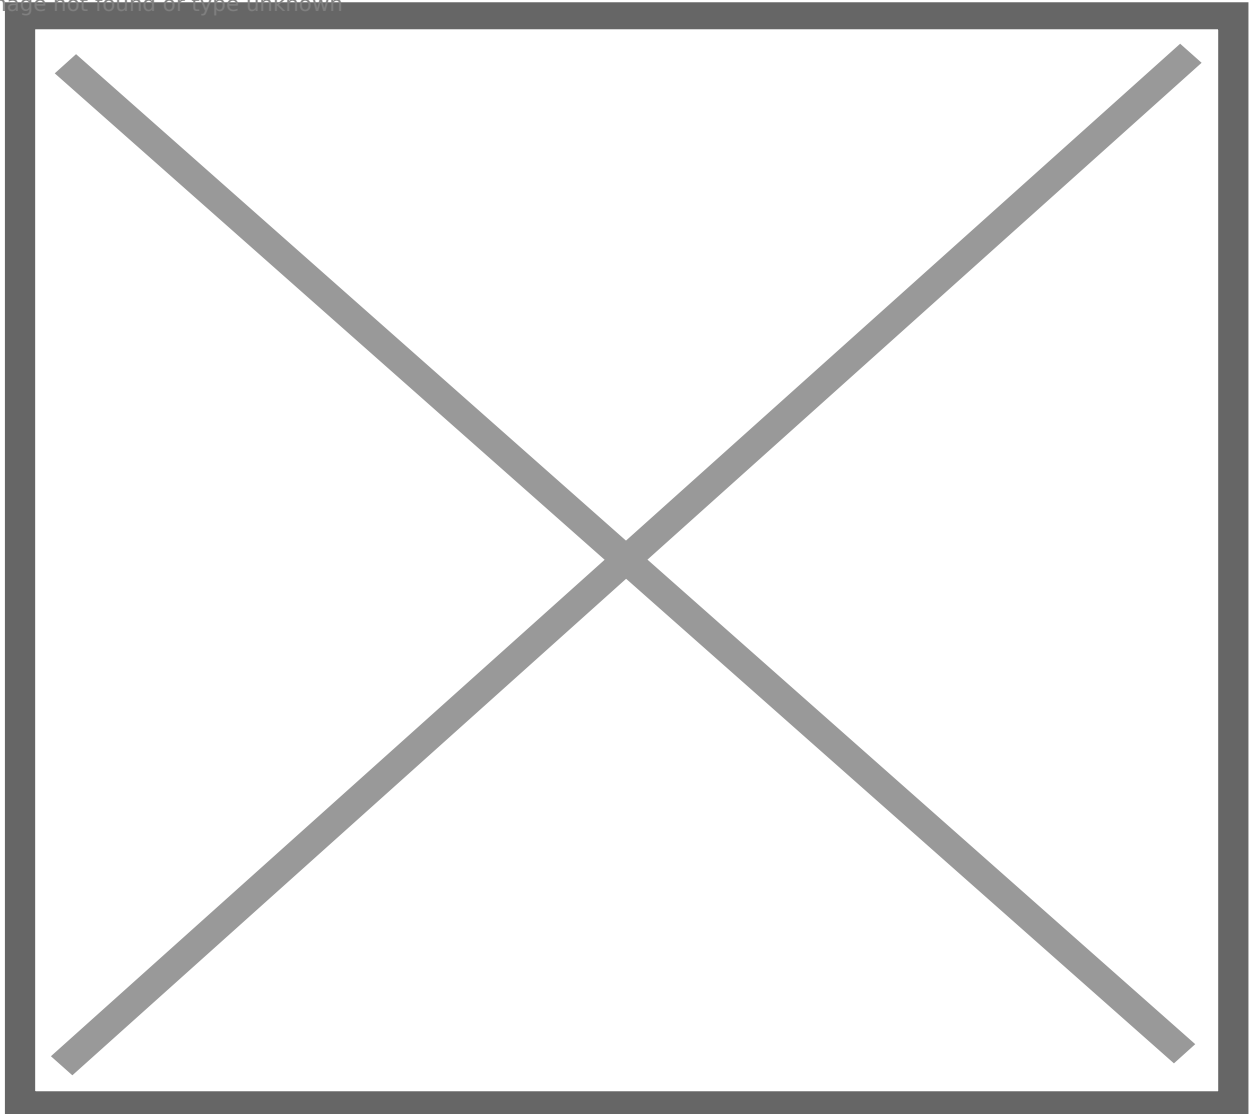

Epicurean philosophy says that the Universe has no beginning and no end.

Article excerpt:

"The current theory of how the Universe came into being can't explain the existence of the planets, stars and galaxies we see around us. Both teams are building detectors that study a sub-atomic particle called a neutrino in the hope of finding answers."

This article is about the Deep Underground Neutrino Experiment (DUNE):
