

What fears does modern science remove, as Epicurean physics did in antiquity?

Post by “Rolf” of June 5, 2025 at 7:18 PM

Another thing that rubs me the wrong way with these sorts of parapsychology investigation groups is that they start with a theory and then try to prove that it's true - not how science should be carried out. In their minds, telepathy or whatever else exists, and they just have to prove that it's true. In other words, they're attached to their hypothesis. No matter how many experiments fail to show any concrete evidence, they stick with the same hypothesis.

That said, I'm no expert on this and I would love to hear your thoughts Patrikios!
