

Epicurus' Prolepsis vs Heraclitus' Flux

Remember, it's specifically stated in the letter to Herodotus by Epicurus:

"To begin with, nothing comes into being *out of what is non-existent*." πρῶτον μὲν ὅτι οὐδὲν γίνεται ἐκ τοῦ μὴ ὄντος

Whether it's atoms or quantum fields, those are still existent things. Things don't spring up out of nothing by the will of the gods.
