I will google but do you have a good link for that? Thanks!

I can't find any full text in English in an html website format. His orations weren't even translated into English until 2007 by Robert Penella under the title of *Man and the Word*-- Himerius is a minor figure, and Julian's pagan renaissance was stillborn. If I ever settle down and buy a house, I mean to assemble a proper library and archive!
