

What Would An Epicurean Use In Their Toolkit For Making Their Hedonic Calculus?

Post by “Hiram” of July 11, 2019 at 9:49 AM

Michel Onfray frequently speaks of the mathematics of hedonic calculus. While reading a book recently on business planning, I found they recommend a spreadsheet with pros and cons of various business models, where a person may consider time involvement for each project and potential profitability.

... it WOULD be interesting if Epicureans today developed a model / excel sheet that can be used for hedonic calculus. Even a simple pros / cons sheet, like the ones used by accountants where the red / left side represents debit and the green / right side represents credit, to have a visual representation of what one is calculating and to measure and compare what one values most.
