Godek to save you time here is an editable version too:
<https://docs.google.com/spreadsheets/d...dit?usp=sharing>

I recommend that anyone who plays with it downloads a backup copy to their local computer just in case someone in the future defaces / destroys it.

I would really like to turn the column headings to an angle so we could get more entries in, and have them readable, but I am not enough of a spreadsheet expert to do that.
