

How the Epicureans might have predicted Lorentz time dilation

Post by “jcblackmon” of January 15, 2026 at 7:07 AM

Hi Martin. Thanks for your valuable feedback. You wrote that you needed more time to finish reading the paper. I'd be very interested in your final thoughts. I'd also appreciate any advice you might have on addressing the normalization issue. It seems to me there are two ways of doing it, but I didn't think many other members would be interested in following us into the weeds on that! You are welcome to write to me directly.
