

Revisiting Issues of The Use of AI in Epicurean Philosophy

[Cassius](#) I respect your inclinations and wouldn't try to change your thoughts on widening the issue of a Stoic vs Epicurean duty to engage. As you confirmed, I think there is little likelihood to gain agreement between debaters, and frankly why should there be? And that is why I'm not suggesting personality driven debate to the public at large. That becomes two men of a certain age nit picking each other's belief's. My thinking was that a scholarly debate read in an academic journal, might raise the misstated issues by Pigliucci to professionals in the field. Any one of those who may better understand Epicurus though your forceful review of Pigliucci becomes a force multiplier so to speak toward your goal of clearing up misconceptions of Epicurean foundations.

Once again, great job!
