

# Discussion of New Article - In An AI World, The Epicurean View of Knowledge Is More Important Than Ever

Post by "Todd" of May 16, 2026 at 12:10 PM

## [Quote from Cassius](#)

Anticipations are the generalized pre-concepts and pattern-recognitions that the mind builds from ***repeated sensory experience***.

This is the thing that jumps out at me.

To summarize my understanding of DeWitt, the anticipations must anticipate something. That something can only be experience. To say that they result from past experience removes them as an independent criterion.
