Welcome [Buck23](#) as for printed versions. I would personally recommend "The Best of Epicurus" By Classic Caves.

It has all of the main letters, most of the biography (it only excludes parts about slander against Epicurus), The Vatican Sayings, and the vast majority of the great speech of Torquatus on Ethics.

It's also translated in a very easy to read, and organized, fashion while being accurate.

I really like the Hedonicon that [Cassius](#) mentioned but the english is a little rough at times sadly due to using older translations and it's missing torquatus but does have the great work of Lucretius which classic caves doesn't. Still recommend if you have an interest.

Happy to have you here!
