

Access to conversation denied

Post by “Godfrey” of September 8, 2019 at 5:54 PM

Cassius, I'm unable to answer or start a conversation. The message "Error Message 403 Forbidden Access to this resource on the server is denied" keeps popping up. I've tried to answer on two Android devices and a Windows computer and get the same popup.

Regarding the Skype discussion, I was sorry to miss it and plan to join in in the future. I do have a lot going on for the next few weeks and so may be sporadic in attending, but not through lack of desire 🙌

Cheers!
