

Technology Question - How Best To Create "Video" With Speech Matched To Scrolling Text

Post by "Kyle" of October 11, 2019 at 1:39 PM

I added the option for choosing a premade audio file and it should work well. I'd recommend not leaving any silence at the beginning or end of the audio file so it matches with the scrolling text.

The scrolling text will use the length of the audio file you give it (in AUDIO_FILE, if you leave it blank it will generate audio through TTS) in order to calculate its scrolling speed.

I uploaded the changes. Next I'm going to create an installer so it's easy for others to use
