

# Indivisibility And Its Significance

Post by "Joshua" of December 31, 2019 at 4:38 AM

Regarding "The God of the Gaps", Neil Degrasse Tyson expresses it well;

## Quote

If that's how you want to invoke your evidence for God, then God is an ever-receding pocket of scientific ignorance that's getting smaller and smaller and smaller as time moves on.

And to put Elayne's point more concretely, we can look to an argument made in *DRN*. Lucretius makes explicit the analogy that compounds of atoms are a kind of coded information, just as latin letters come together to form words. But in order for this to work out, there must be a *finite* library or alphabet of atomic 'letters'. If they could be infinitely divided, no such set would be possible. In this instance, infinity really does lead to zero.
