

Discussion of the Society of Epicurus' 20 Tenets of 12/21/19

Post by "Cassius" of January 8, 2020 at 6:36 AM

I need to get around to reading Stenger, which I have not done. Over time I really hope that this is an area that we can grow and have people who are "into" specialties like this and divide up the labor to do the review and analysis of the material. If we talking about this here now get too carried away with it ourselves we won't do the more important things that need doing. In that respect a lot of these problems do seem to be exactly what Epicurus faced and talked about, which is presumably why there was this flurry of allegations that he was anti-science, which I would bet my life was not at all true.
