

Welcome Nal!

Post by “Elli” of January 24, 2018 at 3:11 PM

Hi Nal, nice to meet you here.

This was my mistake too. I counted 10 days after the new moon that it started this year 17th of January, but as Diogenis Laertius reports is 7 days after the new moon in the month Gamelion, thus Epicurus birthday - for this year - was yesterday the 23 rd of January.

[Thanks](#)
