

# Epicurus' Birthday Calculations

You are correct! Someone got some calculation wrong!

I just stumbled across [another calendar online](#) for an Hellenic pagan church. That one too gives 7 Gamelion as 3 Jan 2020! But it does also look like it uses the [Numachi site that Takis used](#). Oh, this is wonderful! Takis' previous link gave me an error so that's why I chimed in, but this is great! Disregard all my previous sites now.

I noticed that the 1st year of the 700th Olympiad begins 7/10-11/2021. Round numbers often tend to suggest big commemorations. Epicurus birthday (according to THIS resource) in the 1st year of the 700th Olympiad will be Jan. 9-10, 2022. Do we need to plan something big? 😊
