

TO ΠAN: The Sum of All Things

Post by “Cassius” of March 10, 2020 at 7:18 AM

Ah very good, and that is why I have always been familiar with use of that word to mean "everything," and find it frustrating that some segment of modern physics wants to segment that term and consider "multiverse" or something else as larger than the universe itself. Why don't these guys just learn their Latin (and Greek!)?? 😊
