

Epicurean Computer Desktop / Mobile Device Wallpapers

Post by "Cassius" of July 5, 2020 at 8:55 AM

This is to start a thread to encourage those of us who have developed Epicurean-themed wallpapers for desktop or mobile devices to post them here. I personally have not worked on this for quite some time and only made a few very basic ones such as below. These are almost embarrassingly too simple, but I didn't want to start the thread without something. Many of our graphics in the gallery could be used for this purpose, but for general use as a "wallpaper" we're probably talking more about a basic background with some kind of a simple photo or logo. Please post yours in the thread if you have any to share:
